

# Aleeza Rubab

## Frontend Web Developer

As a front-end developer, I'm passionate about developing visually-attractive and user-friendly websites that provide a consistent user experience, by using the latest technologies and best ways to proceed. I have developed my skills in HTML, CSS, JavaScript, and various front-end frameworks such as Bootstrap and React. Extremely motivated to constantly develop my skills and grow professionally.

## EDUCATION

### Bachelor's in Software Engineering

Virtual University of Pakistan

07/2022 - Present

### Frontend Developer [Bootcamp]

Institute of Emerging Careers

02/2023 - 07/2023

#### Courses

- HTML and CSS Fundamentals: Learned the foundational concepts of HTML and CSS, including responsive design, and CSS frameworks like Bootstrap.
- JavaScript Essentials: Developed a strong understanding of JavaScript programming, covering topics such as variables, functions, arrays, objects, and DOM manipulation.
- Version Control with Git: Learned how to effectively use Git for version control.

## WORK EXPERIENCE

### Frontend Development Intern

Interns Pakistan - Remote

05/2023 - 06/2023

#### Achievements/Tasks

- Completed assigned front-end development projects remotely using HTML, CSS, and JavaScript.
- Actively engaged in self-directed learning to enhance technical skills in front-end development.
- Developed a solid understanding of responsive web design principles and applied them to remote projects.
- Actively sought feedback and incorporated it into remote development work to continually improve skills.

### React Developer Intern

Hadi e Learning

08/2023 - 10/2023

#### Achievements/Tasks

- Gained hands-on experience and in-depth knowledge in React. Mastered the concept of component-based development in React, enabling the creation of reusable and maintainable code.
- Developed skills in integrating RESTful APIs into React applications, enabling the retrieval and display of data from external sources.
- Utilized version control systems, such as Git, to collaborate with team members and manage code repositories efficiently.

## SKILLS

HTML5+ CSS3

JavaScript (ES6+)

React JS

Responsive Web Design

Tailwind CSS

React Bootstrap

API Integration

RESTful APIs

Web Application

## PERSONAL PROJECTS

### Ticketing System

- Developed a comprehensive ticketing system using React, powered by Context API and custom hooks. The system is designed to streamline the reporting and resolution of problems faced by clients.
- Implemented a user-centric approach, allowing clients, agents, and managers to have their distinct user profiles, ensuring secure and personalized access.
- Clients can seamlessly create tickets to report issues and problems they encounter.
- Agents can take ownership of tickets, offering specialized assistance in resolving client issues.
- Implemented role-based access control to ensure that clients, agents, and managers have access to functionalities appropriate to their roles. Clients can create tickets, agents can resolve and reply, and managers can supervise and manage escalations.
- Github : [Repo](#)

### Restaurant Website

- Designed and developed a visually appealing restaurant website using React and Tailwind CSS.
- Leveraged the power of Tailwind CSS, a utility-first CSS framework, to efficiently style the website.
- Implemented an interactive menu section that showcases the restaurant's offerings.
- Included image galleries to highlight the restaurant's ambiance, signature dishes, and staff, creating an immersive experience for visitors.
- Provided essential contact information, including the restaurant's address, phone number, and email, making it easy for customers to reach out or locate the restaurant.
