I'm looking for a developer to help improve an app I'm building. The app uses MERN stack and is fairly simple. Frontend, backend, and full-stack available.

Some tasks I need help with:

- improving component functionality throughout app
- debugging existing components
- improving functionality on web with react-native-web
- ensuring backend routes are functional and secure when necessary.
- enhancing our openstreetmap integration with mongo, to be efficient and lightweight
- getting project ready to deploy next week

Stack:

- Next.js / React
- React Native / Expo
- Tamagui
- tRPC
- Node
- Cloudflare

Example first tasks:

Frontend: would be helping to integrate Tamagui UI and migrate a few reusable components to use this

Requirement of front-end developer

Posted 1 hour ago Worldwide

Specialized profiles can help you better highlight your expertise when submitting proposals to jobs like these. [Create a specialized profile.](#)

- User Interface Development: Implement user interfaces following best practices using HTML5, CSS3, and JavaScript frameworks (such as React, Angular, or Vue.js).

- Responsive Design: Ensure seamless experiences across various devices and browsers by creating responsive and adaptive designs.

- Collaboration: Collaborate closely with backend developers, UX/UI designers, and other cross-functional teams to ensure the integration of front end elements with server-side logic.

- Performance Optimization: Identify and address front end performance bottlenecks and optimize applications for speed and scalability.

- Testing and Debugging: Conduct thorough testing of user interfaces, troubleshoot and debug issues to ensure optimal functionality and user experience.

- Version Control: Utilize version control systems like Git to manage and track changes in the codebase.

- Continuous Learning: Stay updated with emerging trends and technologies in front end development to enhance skills and contribute innovative ideas to the team.

Looking for a professional front-end developer to make a page

Posted 4 hours ago Worldwide

Specialized profiles can help you better highlight your expertise when submitting proposals to jobs like these. [Create a specialized profile.](#)

Looking for a front-end developer who can help me in making a html5 page for my static html5 website. I have already had a html5 template, but we need to make a page which your code should be compatible with my html5 template. Also, I can show you a sample page where you can have an idea to do it and its simple, I guess. Also, I will give you other work for my ongoing html5 website where I will pay for that. If you do the best, then I will pay you the best. Please apply who can do it faster.

\$10.00
Fixed-price

Expert
I am willing to pay higher rates for the most experienced freelancers

Develop a rotated card slider component

Posted 12 hours ago Worldwide

Specialized profiles can help you better highlight your expertise when submitting proposals to jobs like these. [Create a specialized profile.](#)

Develop a re-usable web component for a card slider that displays elements along a circular path.

****References:****

- <https://goodweird.com/pages/about>
- <https://clinger.me/en/>

****Requirements for Interaction****

- Rotate cards along a path
- Must support any number of cards—same placement and gap between cards no matter how many cards in the component
- Must appear within page content—other sections above and below
- When user scrolls to this slider, the scroll viewport is locked and scrolling vertically triggers the rotation animation
- When user scrolls down, the cards advance counter-clockwise
- When user scrolls up, cards advance clockwise back to start position
- When final card is in the center, continue scrolling down to additional page content
- Same interaction on mobile/desktop

**** Requirements for Cards****

- Card content contains image, headline, and sub-headline of varying lengths. Must have auto height
