INTRODUCTION

Forget struggling with physical books! Our project unlocks new ways to experience literature. Listen on the go with audio versions, access concise summaries for quick insights, or delve deeper with AI-powered exploration. Ask questions directly about any book, get pinpointed answers with page references, and embark on a journey of enriched book engagement.

Understanding the Problem

1   Limited Time to Read

For many, the demands of a fast-paced lifestyle make dedicating time to reading an entire book challenging.

2   Difficulty Remembering Key Information

Recalling crucial details from books can books can be troublesome, impacting impacting the assimilation of knowledge.

3   Lack of Interactive Access

Engaging with book content in an interactive manner is currently restricted, limiting the limiting the depth of understanding.

Our Innovative Solution

1 PDF Conversion to Audio

2 Automatic Summaries

3 Interactive NLP Inquiries

Our platform offers the convenience of listening to books through audio format, format, catering to various learning styles.

Users can access concise overviews of key points within within books, facilitating efficient knowledge retention. retention.

By enabling NLP-based queries, queries, users can extract contextual information directly directly from the book content, content, enhancing engagement engagement and understanding. understanding.

Evaluating the Market Size

1 Number of Audiobook Users

The audiobook market is is rapidly growing, reflecting the increasing increasing demand for accessible content consumption.

2 Time Spent on Audio Content

With the popularity of podcasts and audio resources, individuals are are dedicating more time time to audio-based learning and entertainment.

3 Demand for Educational Resources

There is a growing need need for educational and and learning resources, creating ample opportunities in the digital digital content market.

Monetization Strategy

Freemium Model

We plan to offer basic features for free, free, with advanced functionalities available through paid subscriptions, emphasizing NLP interactions.

Partnerships with Content Providers

Collaborating with educational platforms and book publishers will enable wider content access, creating revenue through strategic alliances.

Integration with Audiobook Producers

By partnering with audiobook producers, we aim to enhance content distribution and access, and access, leading to potential revenue streams.

Future Development Roadmap

1

Expand NLP Capabilities

Incorporate advanced NLP capabilities to enable the platform to respond to complex user queries effectively.

2

Diverse Book Format Support

Integrate support for various book formats, such as ePub, to expand the breadth of breadth of accessible content.

3

Personalized ML Recommendations

Implement machine learning algorithms to offer personalized book recommendations, enhancing user engagement.

Exploring Revenue Streams

Subscription Model

Consider a subscription-based revenue model for for premium features, ensuring sustained revenue revenue streams.

Strategic Partnerships

Forge strategic alliances with educational platforms and content providers for revenue generation and expanded user reach.

Live Demonstration of Functionality

1

Upload PDF Book

Demonstrate the seamless process of uploading a PDF book onto the platform for conversion.

2

Audio & Summary Generation

Showcase the swift generation of audio and concise summaries for efficient content efficient content consumption.

3

NLP-Powered Responses

Highlight the interactive NLP functionality by asking and receiving contextual contextual information directly from the book.

Thanks!

Appreciation to our team members for their contributions:

1   Szymon Chirowski (Team Leader) (full stack developer)
